

Fortune 500 corporations and leading national law firms trust the EMRG[®] team of HB Solutions to help minimize the risks and costs associated with e-discovery in some of their largest and most challenging legal disputes. The EMRG team provides a wide range of services relating to e-discovery strategy, data preservation, data collection, processing, review and production. The team's predictive coding technology professionals are at the leading edge of applying technology-assisted review and dataset analysis to complex litigation and investigations. Our comprehensive e-discovery solutions are powered by an innovative proprietary methodology which acts as an efficiency engine to increase document review accuracy by up to 70% and reduce review time and costs by up to 50%.

WHAT MAKES US DIFFERENT

When you work with our EMRG team, there are no sales-service handoffs. The team members you initially meet to discuss your objectives are the consultants who will be doing the work every step of the way. The EMRG team's benefits also go well beyond our industry-leading technology. While other litigation support vendors understand data analytics and provide software, our trained litigation support specialists have a deep understanding of the needs of trial attorneys through extensive experience working in law firms and working closely with attorneys, in and out of the courtroom, on a daily basis. This understanding differentiates us from other litigation support vendors and provides real-world insights which can help drive positive outcomes.

EMRG has invested millions of dollars in developing proprietary review platform workflow and deduplication procedures which further enhance the efficiency, speed, accuracy and defensibility of predictive coding, resulting in significant cost savings for our customers.

Our EMRG team's litigation support experience and cutting-edge technology has made us the team organizations, including leading national law firms, trust to protect their best interests by minimizing the risk, time and expense of e-discovery in their biggest and most difficult legal challenges.
